## **UHF TV GRIDKIT Antennas GKA Series**

## Product Description

RFS Parabolic GRIDKIT antennas are designed to be assembled into grid parabolic antennas of comparable performance to welded grid antennas.

These Gridkit antennas have an important advantage - they can be transported broken down into a smaller package, thus greatly reducing transportation costs and handling and storage problems. Assembly can be carried out with a few basic tools and easily achieved at remote sites. Kits contain universal mounting clamps including the panning clamp, but tower mounting tubes are not included. The mounting method allows either horizontal or vertical polarization.

## Features/Benefits

- Extremely rugged mechanical design to withstand high windspeeds (up to 350km/h)
- Standard broadband versions for 335 to 2700MHz bands
- Horizontal or vertical polarization.
- · Easy adjustment of azimuth and elevation
- · Broadband unpressurized feeds, with no trade off in gain slope characteristics
- · Corrosion resistant aluminium tube reflector, hot dip galvanized mounting, stainless steel hardware

Shipping Volume, cu m (cu ft)1.88 (66.3)	55 m/sec
Shipping Dimension - Length, cm (in) 404 (159.1)	
Shipping Dimension - Width, cm (in) 101 (39.8)	
Shipping Dimension - Height, cm (in) 46 (18.1)	
Notes	

Note 2 Wind loading calculated in accordance with AS11/0:Part 2, "SAA Loading Code - Wind Forces".

Note 3 Calculated in accordance with AS1664 and AS1250 (minimum safety factor of 1.5 on yield strength).

Note 4 Add suffix to model number "N" for N type, "E" for 7/8 EIA flange.
