

UHF Slot Antenna LPR Series

Product Description

A new slim and light weight UHF antenna has been developed to provide excellent horizontal pattern performance operating over optimised discrete UHF broadcast bands in 488 - 806 MHz. These uniquely combined features, combined with an extremely low weight and low windload construction make this antenna an ideal choice for applications, such as repeater stations for DVB-H, where an economical and very flexible antenna solution is required.

Features/Benefits

- Horizontal polarised.
- Ideally suited for low power infills or Mobile TV applications.
- Low drag profile underpins the antenna's high wind speed rating and low wind load characteristics.
- Cost-effective
- Broadband.
- High input power.
