

UHF Omnidirectional Antenna MTV Series

Product Description

A new slim and light weight UHF antenna has been developed to provide excellent horizontal pattern circularity operating over the full UHF broadcast band of 470 - 862 MHz. These uniquely combined features, combined with a very low weight and low windload construction make this antenna an ideal choice for applications, such as repeater stations for DVB-H, where an economical and very flexible antenna solution is required.

MTV-4 Antenna

Features/Benefits

- Ideally suited for Mobile TV applications.
- Exhibits low pattern ripple typically better than ± 1.0 dB across the operating frequency range.
- Low drag profile underpins the antenna's high wind speed rating and low wind load characteristics
- Cost-effective
- Full band
