

## UHF Omnidirectional Antenna SCO Series

### Product Description

A new high performance, UHF antenna has been developed to provide excellent pattern stability operating over the full UHF US high power 700MHz broadcast band. These uniquely combined features, combined with low windload construction make this antenna an ideal choice for applications, such as main stations for mobile media, where an economical and very flexible antenna solution is required.

### Features/Benefits

- Ideally suited for Mobile TV applications.
- Exhibits low pattern ripple typically better than  $\pm 1.0$  dB across the operating frequency range.
- Two channel capacity - bandwidth and input power.
- Cost-effective

For detailed technical information use the external document link below.

### Technical Specifications

Product Line	Antenna TV
Product Type	Band V (UHF) TV Omnidirectional Antenna
Frequency Range, MHz	716 - 728
Polarization	Circular
